Thermo-light

floating spa covers

Innovative Thinking

Every spa needs a cover to keep in heat and keep out debris. For larger or free-form in ground spas where regular foam spa covers can be too heavy or cannot be installed, the Custom Spa Cover Team brings you our Thermo-Light Floating Spa Cover.

Quality

Using the finest marine grade top vinyl and a specially formulated inner foam core, your Thermo-Light cover is made to last and will not absorb water. A special large weave mesh bottom insures the cover "skin" will not hold water.

Custom Made

Our CAD design team takes your water's edge measurements or a template of your spa and custom designs a cover to fit perfectly.

- High Insulating Factor.
- Light-Weight.
- Floats on Water Surface.
- Easy to Install and Remove.
- Designed for Your Spa.
- Overlapping Velcro Hinges Allow for Cover to Come Apart in Sections.

Note: Thermo-Light Floating Spa Covers are not designed to meet A.S.T.M standards for safety covers. Thermo-Light spa covers are designed to provide better heat retention and reduce the amount of debris entering your spa only. Thermo-Light spa covers WILL NOT support weight.
